

Xalo López Álvarez

Hello!

My name is Xalo, I am 22 years old and I come from Spain. I live in Galicia which is in the north of this country, in a small city called Santiago de Compostela.

I finished my university studies last year, I studied biology. For next year I want to do a master's degree in biodiversity conservation and management of protected areas, but I wanted to gain experience before that and that's why I am currently here in Lithuania.

Another motivation for me to come as a volunteer in the European Voluntary Service is the desire to learn about other cultures and meet new people here. Also, I want to improve my English (it is a bit simple) and if possible, learn Lithuanian and typical traditions.

As for my personality, I consider myself a responsible, organized and hard-working person. I am sociable and very positive, I am always smiling.

I love to travel, for example, since I finished my degree I have been working with a scholarship in the Azores as a biologist in a nature reserve. Another of my favourite hobbies is nature and sports, I play football and surf among others, but I love all sports.

I am looking forward to meet new things in Lithuania and to live good experiences in this beautiful place as it is Plateliai and Zemaitija National park!
